

TECHNICAL DATA SHEET

DESCRIPTION

TEAM CC DENSO AND DENSO PLUS is water based easy to use coat for **enhanced and longer lasting shine, abrasion and stain resistance**. Fine cracks on the surface can also be treated by this product giving a smooth finish. This product has

1. Multi-purpose uses.
2. Application is easy.
3. Reduces absorption and staining.
4. Enhances the natural color.
5. Prolongs shine and smoothness.

APPLICATION

TEAM CC DENSO AND DENSO PLUS is used in the marble industry as a **shine enhancer** coat. The life of the shine is also increased. It also **reduces absorption** of water and reduces staining by oil and grease. This product can be used for all types of stones and marbles and on concrete.

APPLICATION PROCEDURE

Clean and dry the surfaces properly. This is very important for proper coating and absorption of the material. Shake well before use. Use **DENSO PLUS at 200 grit polish and DENSO at 800 grit polish**.

Spray at low pressure or pour on surface and spread with a wiper. Spread the material if any pooling takes place. Do not allow the material to dry quickly to give it time to be properly absorbed. This process can take up to 30 minutes.

Use grit 200 to polish after use of DENSO PLUS and use grit 800 after use of DENSO.

PHYSICAL PROPERTIES

COLOR: Turbid

SPECIFIC GRAVITY: 1.18-1.20

COVERAGE: 15 mt sq depending on the absorption capacity of substrate.

STORAGE

Store in a cool and a dark place in air tight packing. The material is usable for 12 months.

HAZARDS

The use of safety products like gloves, glasses and mask is recommended, specially during spraying. Protect surfaces nearby not to be coated. Avoid harm to third parties. Do not inhale vapors. If used indoors then ensure proper ventilation. Keep out of reach of children.
